

Gamebird R/C Pilot

The Gamebird R/C Pilot is two high-tech Joysticks in one. 256 positions per axis means that you can at last control all your computer games with a precision previously unheard of. Flight simulators in particular were difficult to control using ordinary joysticks. Now, for the first time, you can perform all the manoeuvres of a real aircraft thanks to the Gamebird R/C Pilot's four axes. The Fujitsu Siemens Computers Gamebird R/C Pilot - Fly it !

Within this package you'll get easyFly, a realistic and user-friendly model flight simulator that introduces you to the world of model flying. You'll be amazed how quickly you learn all about it from this programme. easyFly is not just for beginners, though. Experienced model fliers can also use it to hone their flying skills. easyFly has been tested by European Champion Rüdiger Feil and is the most realistic simulator around.

data sheet

Features Gamebird

- 4-axes, 1-button game control connected to the gameport
- High precision 256-position manoevrability
- Manual finetuning directly on the
- Professional quality
- Comfortable and ergonomic
- Suitable for all computer games requiring a Joystick

Features easyFly

- Natural Flight behaviour of all four models
- Detailed 3D landscape
- Genuine 3D sound with Doppler effect
- Tracking mode, cockpit view and fixed perspective
- Adjustable perspective
- Realistic simulation of thermals and updrafts, adjustable.

Fujitsu Siemens Computers Gamebird R/C Pilot

Article number: FSP:805 000267
EAN-Code: 4 02622700228 9

Technical specification**Axes:**

2x 2 axes joystick with a resolution of 256 steps per axis

Buttons

1 button for free use

Specification

„Heavy Duty“ R/C quality
MTBF: >500.000h

Interface

Standard gameport / MIDI

Compatibility

Windows95/98 DirectX 7.0 for every computer game that requires a joystick

EasyFly Software**System requirements**

Intel Pentium or compatible processor with at least 200MHz (300MHz recommended)
32MB RAM (64MB recommended) and 20MB free hard disc space
CD-ROM drive
OpenGL ICD compatible graphic card with at least 8MB (16 or more recommended)
DirectX compatible soundcard
Windows95/98 with DirectX 7.0 or more
